

相关接口开发API

<https://console-docs.apipost.cn/preview/1ab382e0959767e4/f2076b5a1f0662a4>

1、开发阶段获取授权码

URL: `http://10.166.154.213:30001/auth/sso/test/code?username=admin`

请求方式: GET

参数值: 无

返回值:

```
{
  "code": 0,
  "msg": "success",
  "data": "091ee71fda3861153ee9d708c6648cb7" //授权码
}
```

==注线上阶段: ==在接入系统联调结束后, 平台会在请求各业务系统时将code传递给业务系统

请求如下:

`http://10.166.139.3:8095/#/login?code={authCode}&&asideCollapse={asideCollapse}&&uuid=1&&route=`

业务系统在登录页面截取到code数据后向平台请求获取token信息, 获取平台当前登录用户的token信息

2、根据授权码向TOCC平台请求获取token

通过获取的code信息之后通过获取的授权码以及appid获取当前登录用户信息

code: 业务系统拿到的code数据

app_id: TOCC统一认证平台为每个业务系统统一分配

URL: `http://10.166.154.213:30001/auth/sso/token`

请求方式: POST, FORM表单提交

参数值:

FORM表单参数

code: 091ee71fda3861153ee9d708c6648cb7 //授权码

app_id: tocc_12328_information //应用ID

返回值:

```
{
  "access_token": "338963b3-44f1-438f-b5ea-893a90d7c4fc", //TOKEN
  "token_type": "bearer",
  "refresh_token": "46a3d4d2-fe3a-41ed-a9b1-ecba8541dd78",
  "expires_in": 49999,
  "scope": "all",
  "code": 0
}
```

```
}
```

3、业务系统根据token获取当前登录用户信息

一：当业务系统没有用户管理功能，可以根据token获取相应的用户数据

二：当业务系统有用户管理功能，可根据获取用户数据对比自身数据库的用户信息，完成用户在本业务系统中的数据鉴权

URL: `http://10.166.154.213:30001/sys/user/info`

请求方式: POST、GET

请求参数:

`Authorization: Bearer 338963b3-44f1-438f-b5ea-893a90d7c4fc`

此参数放置于Header中，名称Authorization固定，值为Bearer[空格]TOKEN值

返回值:

```
{
  "code": 0,
  "msg": "success",
  "data": {
    "id": "10000001",
    "name": "管理员",
    "username": "admin",
    "realName": "管理员",
    "headUrl": "0c8d48fab52576f07efc4effe5620ddd",
    "gender": 0,
    "email": "mq@qzsoft.cn",
    "mobile": "18988888888",
    "password": "",
    "status": 1,
    "superAdmin": 1,
    "superTenant": null,
    "tenantCode": null,
    "positionDesc": "管理员",
    "hrEmployeeId": null,
    "deptId": "1",
    "deptCode": null,
    "deptName": "山东高速集团",
    "deptFullName": "山东高速集团",
    "companyId": "1",
    "companyCode": null,
    "companyName": "山东高速集团",
    "companyFullName": "山东高速集团",
    "superiorId": null,
    "token": null,
    "depts": null,
    "companies": [],
    "roleBusinesses": [],
```

```
"deptIdList": null,
"deptCodeList": null,
"authorities": null,
"roleEquipments": [],
"enabled": true,
"xdluserId": null,
"accountNonExpired": true,
"accountNonLocked": true,
"credentialsNonExpired": true
}
}
```

4、业务系统根据token数据获取组织机构树

URL: http://10.166.154.213:30001/sys/dept/tree/get_tree_all

请求方式: POST, FORM表单提交

请求参数:

Authorization: Bearer 338963b3-44f1-438f-b5ea-893a90d7c4fc

此参数放置于Header中, 名称Authorization固定, 值为Bearer[空格]TOKEN值

FORM表单参数

id: 1541804044676087809 此参数选填, 如填写时, 返回以此ID为父级组织结构的子级组织机构树。

返回值:

```
{
  "code": 0,
  "msg": "success",
  "data": [
    {
      "id": "1",
      "pid": "",
      "children": [
        {
          "id": "1541804044676087809",
          "pid": "1",
          "children": null,
          "code": null,
          "name": "山东高速信息集团",
          "fullName": "山东高速集团/山东高速信息集团",
          "type": "1",
          "sort": null,
          "spell": "SDGSXXJT",
          "hasLeaf": true,
          "checked": null,
          "inChildren": null,
          "allChildrenChecked": null,
          "pcode": null
        }
      ]
    }
  ],
}
```

```

        "code": null,
        "name": "山东高速集团",
        "fullName": "山东高速集团",
        "type": "1",
        "sort": "100007204",
        "spell": "",
        "hasLeaf": false,
        "checked": null,
        "inChildren": null,
        "allChildrenChecked": null,
        "pcode": null
    }
}
}

```

5、业务系统根据token数据获取组织机构下的用户信息

URL: <http://10.166.154.213:30001/sys/user/getUserListByCompanyAndDept>

请求方式: POST, JSON方式

请求参数:

Authorization: Bearer 338963b3-44f1-438f-b5ea-893a90d7c4fc

此参数放置于Header中, 名称Authorization固定, 值为Bearer[空格]TOKEN值

JSON参数

```

{
    "companyName": "山东高速信息集团", //公司名称, 此参数选填, 如果填写时, 需要填写公司准确名称, 根据公司名称精准查询
    "deptName": "" //部门名称, 此参数选填, 如果填写时, 可填写部门名称中的关键字, 根据部门名称关键字模糊查询。
}

```

返回值:

```

{
    "code": 0,
    "msg": "success",
    "data": [
        {
            "spell": "SDGSXXJT",
            "code": null,
            "fullName": "山东高速集团/山东高速信息集团",
            "pid": "1",
            "sort": null,
            "type": "1",
            "inChildren": null,
            "allChildrenChecked": null,
            "children": null,
            "name": "山东高速信息集团",
            "checked": null,
            "PCode": null,

```

```
"id": "1541804044676087809",
"hasLeaf": true,
"users": [
  {
    "id": "1541804424029913089",
    "username": "test",
    "positionDesc": null,
    "realName": "测试用户",
    "headUrl": null,
    "gender": "0",
    "genderName": null,
    "idCard": null,
    "email": null,
    "mobile": "18905318798",
    "mobile2": "18905318798",
    "officeRoom": null,
    "deptId": "1541804044676087809",
    "deptName": null,
    "deptFullName": null,
    "companyId": "1541804044676087809",
    "companyName": null,
    "status": 1,
    "spell": null,
    "superiorId": null,
    "superiorName": null,
    "startDate": null,
    "endDate": null,
    "superAdmin": 0,
    "createDate": "2022-06-28 23:23:15",
    "deptList": null,
    "roleBusinessList": null,
    "roleList": null
  }
]
}
}
```
